  - Ver. 4.6.1.8 (03.09.2018)
  - Ver. 4.6.1.7 (23.08.2018)
  - Ver. 4.6.1.6 (02.08.2018)
  - Ver. 4.6.1.5 (27.07.2018)
  - Ver. 4.6.1.4 (18.06.2018)
  - Ver. 4.6.1.3 (05.06.2018)
  - Ver. 4.6.1.2 (22.05.2018)
  - Ver. 4.6.1.1 (17.05.2018)
  - Ver. 4.6.1.0 (27.04.2018)
  - Ver. 4.5.7.1 (21.03.2018)
  - Ver. 4.5.7.0 (08.03.2018)
  - Ver. 4.5.6.1 (13.02.2018)
  - Ver. 4.5.6.0 (31.01.2018)
  - Ver. 4.5.1.1 (24.10.2017)
  - Ver. 4.5.1.0 (28.08.2017)
  - Ver. 4.5.0.2 (07.08.2017)
  - Ver. 4.5.0.1 (10.07.2017)
  - Ver. 4.5.0.0 (22.03.2017)
  - Ver. 4.4.1.4 (14.03.2017)
  - Ver. 4.4.1.3 (31.01.2017)
  - Ver. 4.4.1.2 (16.01.2017)
  - Ver. 4.4.1.1 (18.10.2016)
  - Ver. 4.4.1.0 (26.08.2016)
- Community Editions

Installation Notes

Java

Oracle Java Platform 8 (JDK) must be installed. Installation packages can be downloaded from here:

> Java Platform, Standard Edition: http://www.oracle.com/technetwork/java/javase/downloads/index.html

Note: Open-JDK cannot be used because of the lack of JavaFX support.

Java 9/10

Current version of CS-Studio doesn't run on the Java 9/10 VM. If you have installed Java 9 (possibly because you are evaluating or working with it) and Java 8, then you need to tell CS-Studio to used Java 8.

On MacOS X

- Right-click on the *ESS CS-Studio.app* application and select ***Show Package Contents*** menu item;
- Navigate into the `Contents/Eclipse` folder and edit the `ESS CS-Studio.ini` file;
- Before `--launcher.library` add the following two lines:

```
-vm

/Library/Java/JavaVirtualMachines/jdk1.8.0_181.jdk/Contents/Home/jre/bin
```

where `jdk1.8.0_181.jdk` should be replaced by the Java 8 version you have installed.

On CentOS

- Edit the `/opt/cs-studio/ESS CS-Studio.ini` file;
- Before `--launcher.library` add the following two lines:

```
-vm

/usr/java/jdk1.8.0_181/jre/bin
```

where `jdk1.8.0_181` should be replaced by the Java 8 version you have installed.

On Windows (Unsupported Platform)

- Edit the `ESS CS-Studio.ini` file inside the application folder;
- Before `--launcher.library` add the following two lines:

```
-vm

C:\Program Files\Java\jdk1.8.0_181\jre\bin\
```

where `jdk1.8.0_181` should be replaced by the Java 8 version you have installed.

Memory

CS-Studio runs pretty well on machine with at least 4 GBytes. If it must be run from inside the ESS DM, at least 8 GBytes are necessary, allocating 4 for the DM.

css-update

The supported method to update CS-Studio in the DM is described here.

Documentation

- Documentation about ESS version of CS-Studio can be found at the ESS CS-Studio homepage.
- Compatibility notes can be found at the CS-Studio Compatibility Notes and Known Bugs page.

Development

Ver. 4.6.1.26

- Release Status
- Linux Download
- MacOS X Download
- Windows Download

What Is Changed

- Nothing yet.

Production
